

Xtra Wash

Product Description & Technical Composition

Description

Xtra Wash is a superior cleaner, designed to deliver the most powerful cleaning performance. Using cutting edge technology that offers the safest, environmentally friendly solution.

Xtra Wash can be used for almost any cleaning job, in particular those heavy duty, ingrained dirt jobs that can take a considerable amount of time to achieve good results. Xtra Wash does the job in a fraction of the time without the use of pressure washing machines.

Xtra Wash uses naturally derived surfactants and smart technology that offers significant better results than those using Citric, Glycolic or Phosphoric acid.

Xtra Wash has been optimised to give superior results without the toxic sometimes-dangerous chemicals.

Xtra Wash rapidly degrades under aerobic or anaerobic conditions.

Remove any gross soiling. Spray liberally over the entire area and allow to work through heavy soiling for a few minutes. Using a soft bristle brush to agitate ensuring complete breakdown of soil and grease then rinse with water.

Features & Benefits

Excellent cleaning and deodorising.

Non-flammable

Non-abrasive

Safe and non-toxic to use

Excellent environmental profile.

Low contribution to BOD/COD

Saves water and time

Unclassified at use dilutions

Excellent handling and shipping credentials.

Applications

All hard surfaces including concrete, stone, block paving, wood, plastics and painted surfaces.

Cleans soft surfaces such as carpets.

Removes limescale.

Softens and removes dirt and grime.

Powerful degreasing action.
